

NEXT-LEVEL BUG HUNTING CODE EDITION

GUSTO 2021

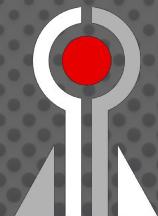

INTRODUCTIONS - SETH LAW

SETH LAW - FOUNDER, REDPOINT SECURITY

BASED OUT OF SALT LAKE, UTAH

**BACKGROUND AS CONSULTANT, PROGRAMMER, TRAINER,
SPEAKER AND OF COURSE... A LOT OF CODE REVIEW.**

@SETHLAW

Redpoint

INTRODUCTIONS - KEN

STAFF ENGINEER - GITHUB

BASED OUT OF GAINESVILLE, VA

BACKGROUND:

**CODER, CONSULTANT, DEFENDER, TRAINER, SPEAKER... AND
SIMILARLY... A LOT OF CODE REVIEW ALONG THE WAY.**

@CKTRICKY

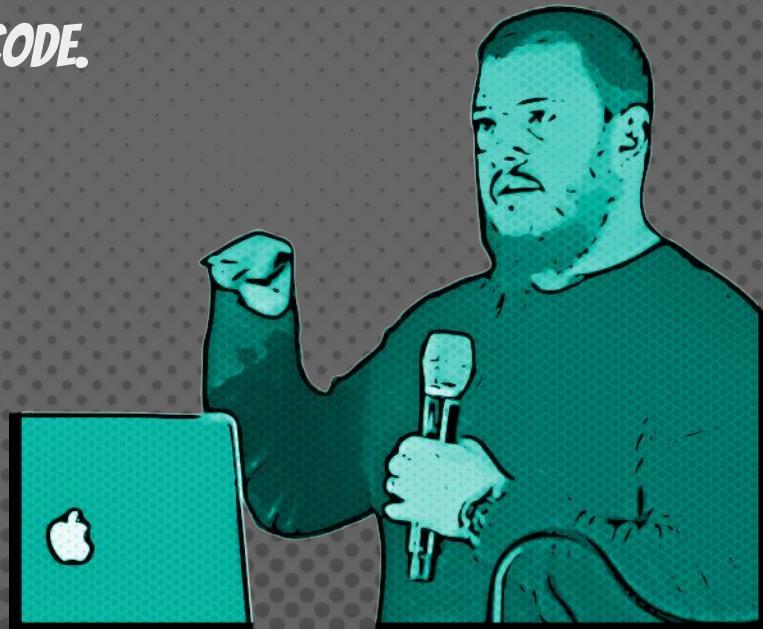

ABSOLUTE
AppSec

OVERVIEW

- REPEAT AFTER ME:
 - ***THE BEST WAY TO IDENTIFY VULNERABILITIES AND EXPLOITS IN AN APPLICATION IS TO LOOK AT SOURCE CODE.***

PHILOSOPHY - PART 1

- ***INCREASE THE LIKELIHOOD OF SUCCESS. NOT "FIND EVERY BUG IMAGINABLE!"***
- ***SUCCESSFUL IS DEFINED AS:***
 - ***FOCUSING ON WHAT MATTERS BY TAKING A RISK BASED APPROACH***
 - ***COMPREHENSIVE***
 - ***TIMELY***
 - ***EASILY CONSUMED, WELL DRAFTED REPORTING***
 - ***DETAILED NOTES***

PHILOSOPHY - PART 2

- ***LANGUAGE AGNOSTIC PRINCIPLES***
 - ***LEARN HOW TO BE AN EXPERT IN BECOMING AN EXPERT***
- ***WE'RE HERE TO LEARN A REPEATABLE SYSTEMATIC APPROACH TO FINDING BUGS***
 - ***BUT WITH UNDERSTANDING THAT YOU MAY LATER CHOOSE TO TWEAK THIS APPROACH TO SUIT YOU***

WHAT TO EXPECT

- ***OUR EXPERIENCE AND STORIES***
- ***SPECIFIC INFORMATION ABOUT REVIEWING CODE***
- ***INTERACTIVE HANDS-ON EXERCISES***
- ***PRACTICE, PRACTICE, PRACTICE***

LET'S TALK ABOUT APPROACH

LET'S TALK ABOUT APPROACH

SEVERAL TYPES OF REVIEWS:

- ***YOU DECIDE HOW MUCH TIME YOU SPEND ON THE REVIEW (IDEAL WORLD)***
- ***YOU HAVE NO TIME AT ALL (REAL WORLD)***
- ***CONSULTING MIDDLEGROUND WHERE YOU HAVE A SET TIME AND SCOPED (HOPEFULLY) WELL OR AT LEAST SEMI "OKAY"***

NONE OF THESE TYPES MEAN "RUN A SCANNER AND ANALYZE THE RESULTS"

FIRST, LET'S TALK ABOUT WHAT WE'RE DOING HERE

THIS COURSE IS INTENDED TO DO THE FOLLOWING, AT A HIGH LEVEL:

- 1. SHOW YOU WHERE TO LOOK - SOURCE TO SINK**
- 2. SHOW YOU WHAT TO LOOK FOR, EXAMPLES:**
 - A. AUTHZ/AUTHN**
 - B. VULNS SPECIFIC TO THE TYPE OF APP**
 - C. GENERAL/OWASP APPSEC VULNS**
- 3. SHOW WHERE AUTOMATION FITS IN THE SOURCE CODE REVIEW PROCESS**
- 4. SHOW SOME VALIDATION AND REMEDIATION OF THE ISSUES**

ALSO, LET'S TALK ABOUT WHAT WE AREN'T DOING

THIS COURSE IS NOT INTENDED TO:

- 1. TEACH YOU THE OWASP TOP 10**
- 2. REVIEW WEB VULNERABILITIES**
- 3. COVER TECHNIQUES FOR FINDING VULNERABILITIES IN RUNNING APPLICATIONS**
- 4. BE A PRIMER ON BUILDING SECURE APPLICATIONS**
- 5. COVER ALL THE WAYS THAT VULNERABILITIES MANIFEST IN CODE.**

REPOSITORIES

OWASP

- ***HOW DOES THE OWASP TOP 10 RELATE?***
- ***WHAT RESOURCES DOES OWASP PROVIDE?***
- ***HOW DOES THIS COURSE DIFFER FROM THE OWASP CODE REVIEW METHODOLOGY?***

SECURE CODE REVIEW METHODOLOGY

OVERVIEW

SECURE CODE REVIEW METHODOLOGY

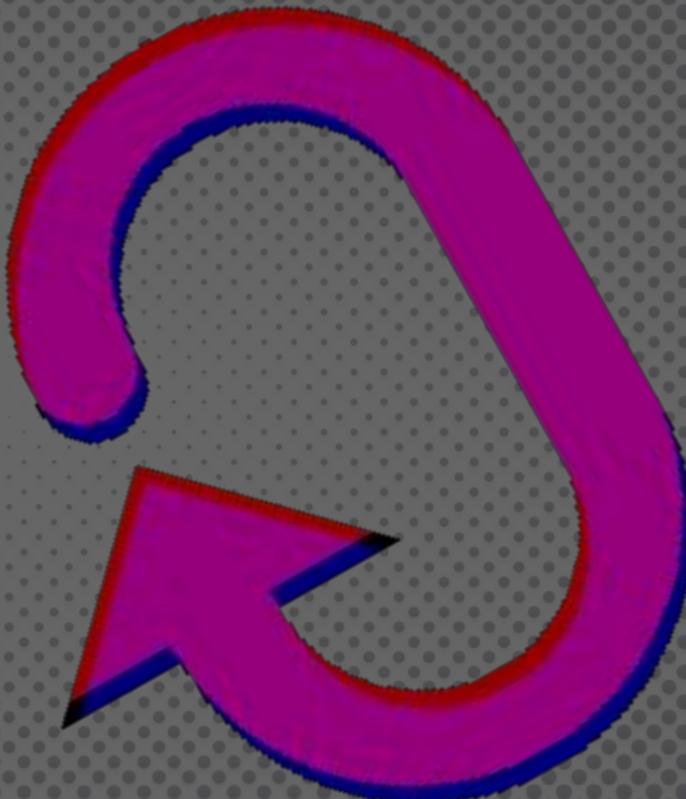

- 1. APPLICATION OVERVIEW &
RISK ASSESSMENT**
- 2. INFORMATION GATHERING**
- 3. CHECKLIST CREATION**
- 4. PERFORM REVIEWS**

CHECKLISTS/REVIEWS

- **AUTHORIZATION**
- **AUTHENTICATION**
- **AUDITING**
- **INJECTION**
- **CRYPTOGRAPHIC**
- **CONFIGURATION**
- **REPORTING**

THE CIRCLE-K FRAMEWORK

- 1. OPEN A FILE, TAKE NOTES :-)**
- 2. GET TO KNOW THE APPLICATION PURPOSE**
- 3. MAP THE APPLICATION**
- 4. BRAINSTORM RISKS TO THE APPLICATION**
- 5. BUILD LIST OF REVIEW ITEMS**
- 6. PERFORM ALL REVIEWS**
- 7. DOUBLE BACK (3-6)**

GENERAL PRINCIPLES

- **GIVE YOURSELF ADEQUATE TIME**
- **WORK IN SMALL CHUNKS**
- **STAY ON TASK WITH CURRENT OBJECTIVE**
- **DON'T MAKE IT PERSONAL**
- **ASK QUESTIONS**
- **FRAMEWORK/CODE DOCUMENTATION IS YOUR FRIEND**
- **BUILD THE CODE**
- **RUN THE TESTS**

FOCUS ON WHAT'S IMPORTANT

- **WHAT HAPPENS WHEN YOU RUN INTO 2 MILLION LINES OF CODE?**
- **AND ONLY HAVE TWO WEEKS TO LOOK AT IT?**
- **WE WILL TALK MORE ABOUT THIS...**

NOTE TAKING

NOTE TAKING

- **FORMAT TYPICALLY USED**
 - **COMMIT # (IF AVAILABLE)**
 - **TWO SECTIONS**
 - I. **ACTUAL FINDINGS**
 - II. **NOTES FROM THE REVIEW**
- **ACTUAL FINDINGS FILLED OUT AT THE END**
 - **DESCRIPTION / RECOMMENDATION**
 - **OPTIONAL (OR NOT) - IMPACT/RISK**
 - **INCLUDES LINKS TO THE CODE IN QUESTION AND/OR SCREENSHOTS**
 - **IF APPLICABLE, REPRODUCTION STEPS BUT THAT MIGHT NOT BE POSSIBLE IF PURELY STATIC**
 - **AVOID EMOTIVE WORDS**
- **NOTES FROM THE REVIEW INCLUDE (AT A MINIMUM)**
 - A. **ROUTE MAPPING**
 - B. **"THREAT MODEL" DETAILS (REALLY, RAMBLING THOUGHTS ABOUT WHAT COULD GO WRONG")**
 - I. **PAIR WITH OTHERS!!!**
 - C. **CHECKLIST OF ITEMS YOU'VE CHECKED FOR BASED ON YOUR THREAT MODEL BUT ALSO YOUR NORMAL "THINGS" YOU SHOULD LOOK AT**

NOTE TAKING - EXAMPLE

We assessed commit #74e64e1ccb617c83ba1db4cbbb24a33051e169f8

Notes for you/your team

Behavior

- What does it do? (business purpose)

Task Manager

- Who does it do this for? (internal / external customer base)

Internal Employees & External Customers

- What kind of information will it hold?

Tasks, Notes, Projects.. could be sensitive Date of Birth of users

Brainstorming / Risks

- XSS - notes, projects and tasks
- Appears to use MD5 for passwords?
- TM employees using the product for managing their own products... ramifications?
- noticed file uploads for profile pics - file access/handling
- What if sensitive pics are uploaded to the projects - CONFIRMED THAT PROJECTS CAN BE EXPLOITED
- Image processing... RCE? Something else like traversal/LFI/RFI?

Checklist of things to review based on Brainstorming

- Command Injection: system, call, popen, stdout, stderr, import os
- SQL Injection: raw, execute, select, where
- XSS: Autoescape, |safe, escapejs
 - Take a look at filenames and see if we render those unsafely anywhere
- File handling: File , django.core.files
- CSRF on the password change?
- IDOR on Projects/Notes/Tasks/Profile

REVIEW TYPES

REVIEW TYPES

- **FULL ASSESSMENT**
- **ASSESSMENT OF NEW CODE SINCE LAST REVIEW**
- **SINGLE PULL REQUEST OR SMALL CODE CHANGES REVIEW**
- **SCANNER FINDINGS**

REVIEW TYPES

1. **FULL ASSESSMENT** 
2. **ONLY NEW CODE** 
3. **PULL REQUEST REVIEW** 
4. **SCANNER FINDINGS** 
1. **EVERYTHING IS APPLICABLE** 
2. **DEPENDS ON ... SEEN THIS APP BEFORE?**
3. **CONTEXT SPECIFIC BITS (AUTHZ FUNCTIONS, LOGIC PROCESSING, DB QUERIES, ETC.)**
4. **MEH** 

APPLICATION OVERVIEW & RISK ASSESSMENT

APPLICATION OVERVIEW & RISK ASSESSMENT

BUILD A PORTRAIT OF THE APPLICATION

- ***BEHAVIOR PROFILE***
- ***TECHNOLOGY STACK***
- ***APP ARCHEOLOGY***

BEHAVIOR PROFILING

- **WHAT DOES IT DO? (BUSINESS PURPOSE)**
- **WHO DOES IT DO THIS FOR? (INTERNAL / EXTERNAL CUSTOMER BASE)**
- **WHAT KIND OF INFORMATION WILL IT HOLD?**
- **WHAT ARE THE DIFFERENT TYPES OF ROLES?**
- **WHAT ASPECTS CONCERN YOUR CLIENT/CUSTOMER/STAFF THE MOST?**

TECHNOLOGY STACK

- **FRAMEWORK & LANGUAGE - RAILS/RUBY, DJANGO/PYTHON, MUX/GOLANG**
- **3RD PARTY COMPONENTS, EXAMPLES:**
 - **BILLING LIBRARIES (RUBYGEM, NPM, JAR, ETC.)**
 - **JAVASCRIPT WIDGETS - (MARKETING TRACKING, SALES CHAT WIDGET)**
 - **RELIANT UPON OTHER APPLICATIONS - SUCH AS RECEIVING WEBHOOK EVENTS**
- **DATASTORE - POSTGRESQL, MYSQL, MEMCACHE, REDIS, MONGODB, ETC.**

APPLICATION ARCHEOLOGY

- **LOOK AT THE DOCUMENTATION. EXAMPLES:**
 - **USING SSO? SAML/OAUTH?**
 - **WHAT THIRD-PARTY ELEMENTS DOES COMMUNICATE WITH? (EG: EXTERNAL REPORTING, BILLING)**
 - **CUSTOM AUTHENTICATION SCHEMAS - FOR INSTANCE - DIFFERENT AUTH FOR API VERSUS WEB INTERFACE**
- **GIT ALLOWS YOU TO DO A LITTLE SPELKING**
- **UNIT TESTS**
 - **LEARN ABOUT THE DATA ENDPOINTS EXPECT TO RECEIVE**
 - **LEARN ABOUT EXPECTED BEHAVIOR**
 - **OFTEN CAN FIND THE WAY TO FORM/CRAFT A REQUEST**

APPLICATION OVERVIEW & RISK ASSESSMENT

[HTTPS://GITHUB.COM/IMA-WORLDHEALTH/BHIMA](https://github.com/IMA-WorldHealth/bhima)

```
/* global inject, expect */

describe('PasswordMeterService', () => {
  let PasswordMeterService;
  let Session;

  beforeEach(module(
    'ngStorage',
    'angularMoment',
    'bhima.services',
    'bhima.mocks',
    'ui.router'
  ));

  const WEAK_PASSWORD = 'hello';
  const MEDIUM_PASSWORD = 'L0b1Ec0simba';
  const STRONG_PASSWORD = 'N@pM@ch3N#L1my3B0ndy3@!';

  beforeEach(inject((_PasswordMeterService_, _SessionService_, _MockDataService_) => {
    PasswordMeterService = _PasswordMeterService_;
    Session = _SessionService_;

    const user = _MockDataService_.user();
    const project = _MockDataService_.project();
    const enterprise = _MockDataService_.enterprise();
    Session.create(user, enterprise, project);

    // make sure password validation is on
    Session.enterprise.settings.enable_password_validation = true;
  }));
})
```

```
it('#counter() should return -1 for no password', () => {
  const count = PasswordMeterService.counter();
  expect(count).to.equal(-1);
});

it('#validate() should return false for no password', () => {
  const validate = PasswordMeterService.validate();
  expect(validate).to.equal(false);
});

it('#counter() should return 0 for a weak password', () => {
  const count = PasswordMeterService.counter(WEAK_PASSWORD);
  expect(count).to.equal(0);
});

it('#validate() should return false for a weak password', () => {
  const validate = PasswordMeterService.validate(WEAK_PASSWORD);
  expect(validate).to.equal(false);
});

it('#counter() should return 3 for a medium password', () => {
  const count = PasswordMeterService.counter(MEDIUM_PASSWORD);
  expect(count).to.equal(3);
});

it('#validate() should return true for a medium password', () => {
  const validate = PasswordMeterService.validate(MEDIUM_PASSWORD);
  expect(validate).to.equal(true);
});

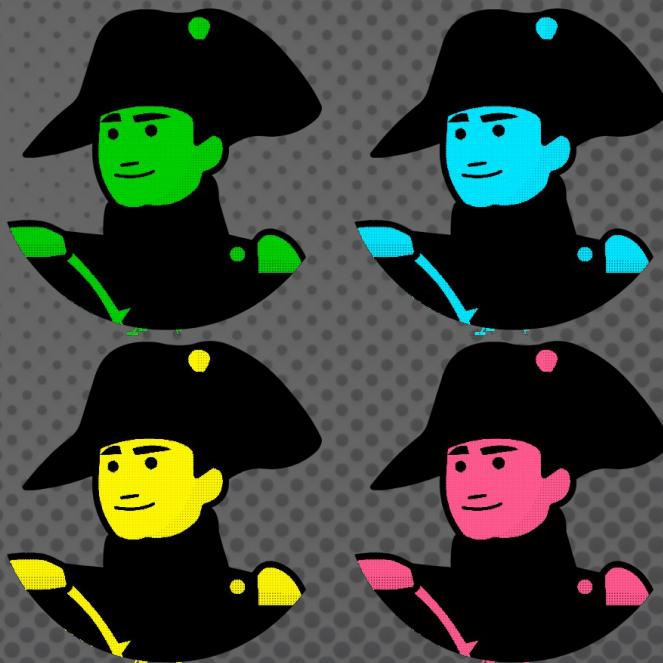

it('#counter() should return 4 for a strong password', () => {
  const count = PasswordMeterService.counter(STRONG_PASSWORD);
  expect(count).to.equal(4);
});
```

APPLICATION OVERVIEW & RISK ASSESSMENT

EXERCISE NAPOLEON

I. BHIMA

- A. TECH STACK**
- B. BUSINESS PURPOSE**
- C. APPLICATION RISK**
- D. ANYTHING ELSE?**

NAPOLEON EXERCISE - POST-MORTEM

AT A MINIMUM, THESE ITEMS WERE OF NOTE:

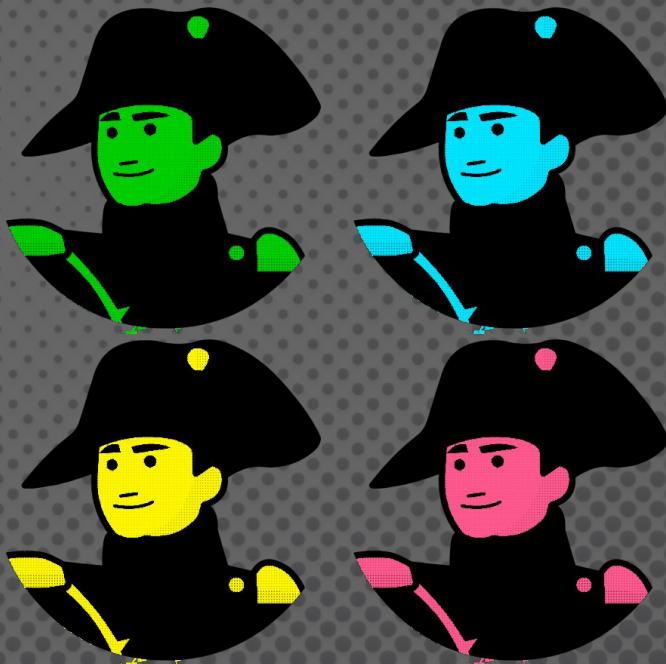

- **BUSINESS PURPOSE**
 - **BASIC HOSPITAL INFORMATION MANAGEMENT APPLICATION**
- **TECH STACK**
 - **NODE.JS / EXPRESS**
 - **ANGULAR**
 - **MYSQL/REDIS**
- **DOCUMENTATION**
 - [HTTPS://GITHUB.COM/IMA-WORLDHEALTH/BHIMA/WIKI](https://github.com/IMA-WorldHealth/BHIMA/wiki)
 - [HTTPS://DOCS.BHMA.MA/EN/](https://docs.bhma.ma/en/)
- **RISKS**
 - **PATIENT DATA**
 - **EMPLOYEE PAYROLL INFORMATION**

NAPOLEON EXERCISE - POST-MORTEM

OTHER IMPORTANT SECURITY PORTIONS OF THE APP:

- **EXPRESS CONFIGURATION -**
 - **SERVER/CONFIG/EXPRESS.JS**
 - **USES DEFAULT HELMET.JS**
- **USER AUTHENTICATION**
 - **SERVER/CONTROLLERS/AUTH.JS**
- **ADMIN FOLDER**
 - **LOGIC FOR ADMIN LOGINS -**
SERVER/CONTROLLERS/ADMIN/USERS/INDEX.JS

INFORMATION GATHERING

INFORMATION GATHERING

"THE MOST IMPORTANT THING IS TO UNDERSTAND THE APP"

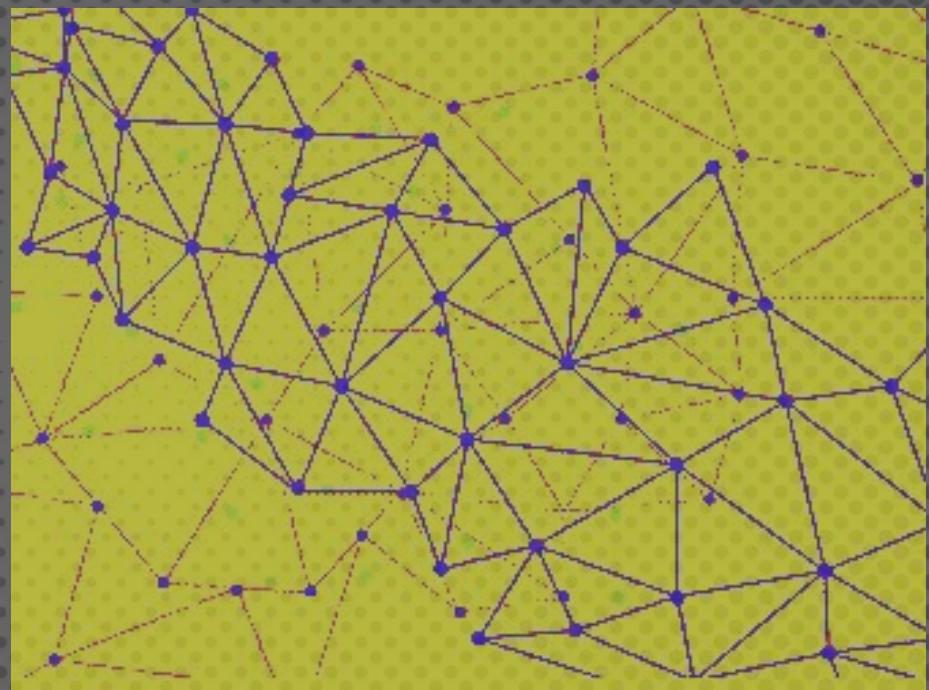

"- SETH LAW"

- CKTRICKY

INFORMATION GATHERING

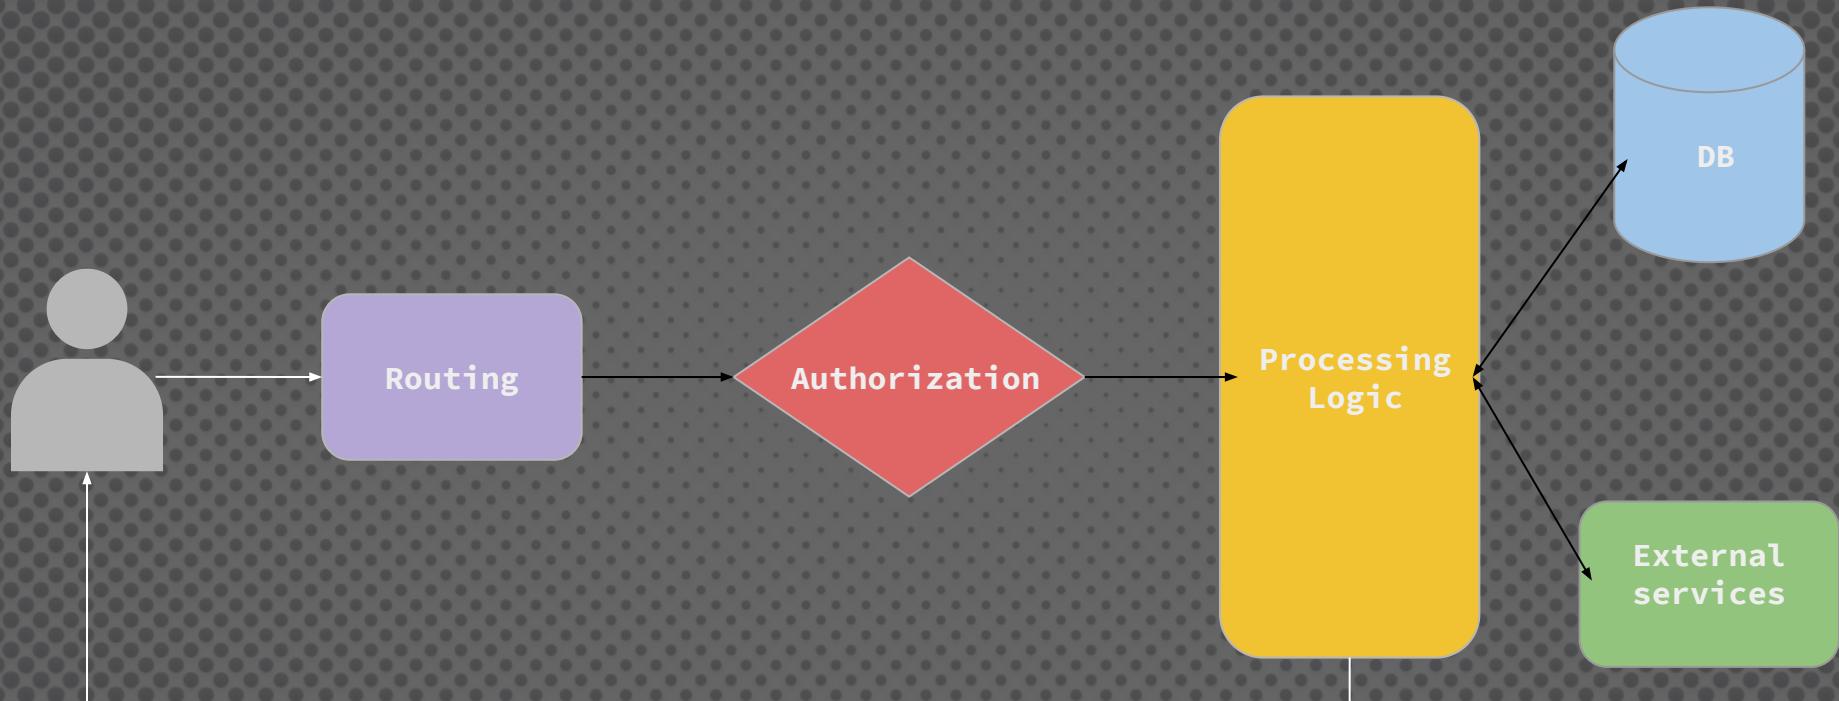

- 1. CREATE APPLICATION MAP**
- 2. IDENTIFY AUTHORIZATION FUNCTIONS**

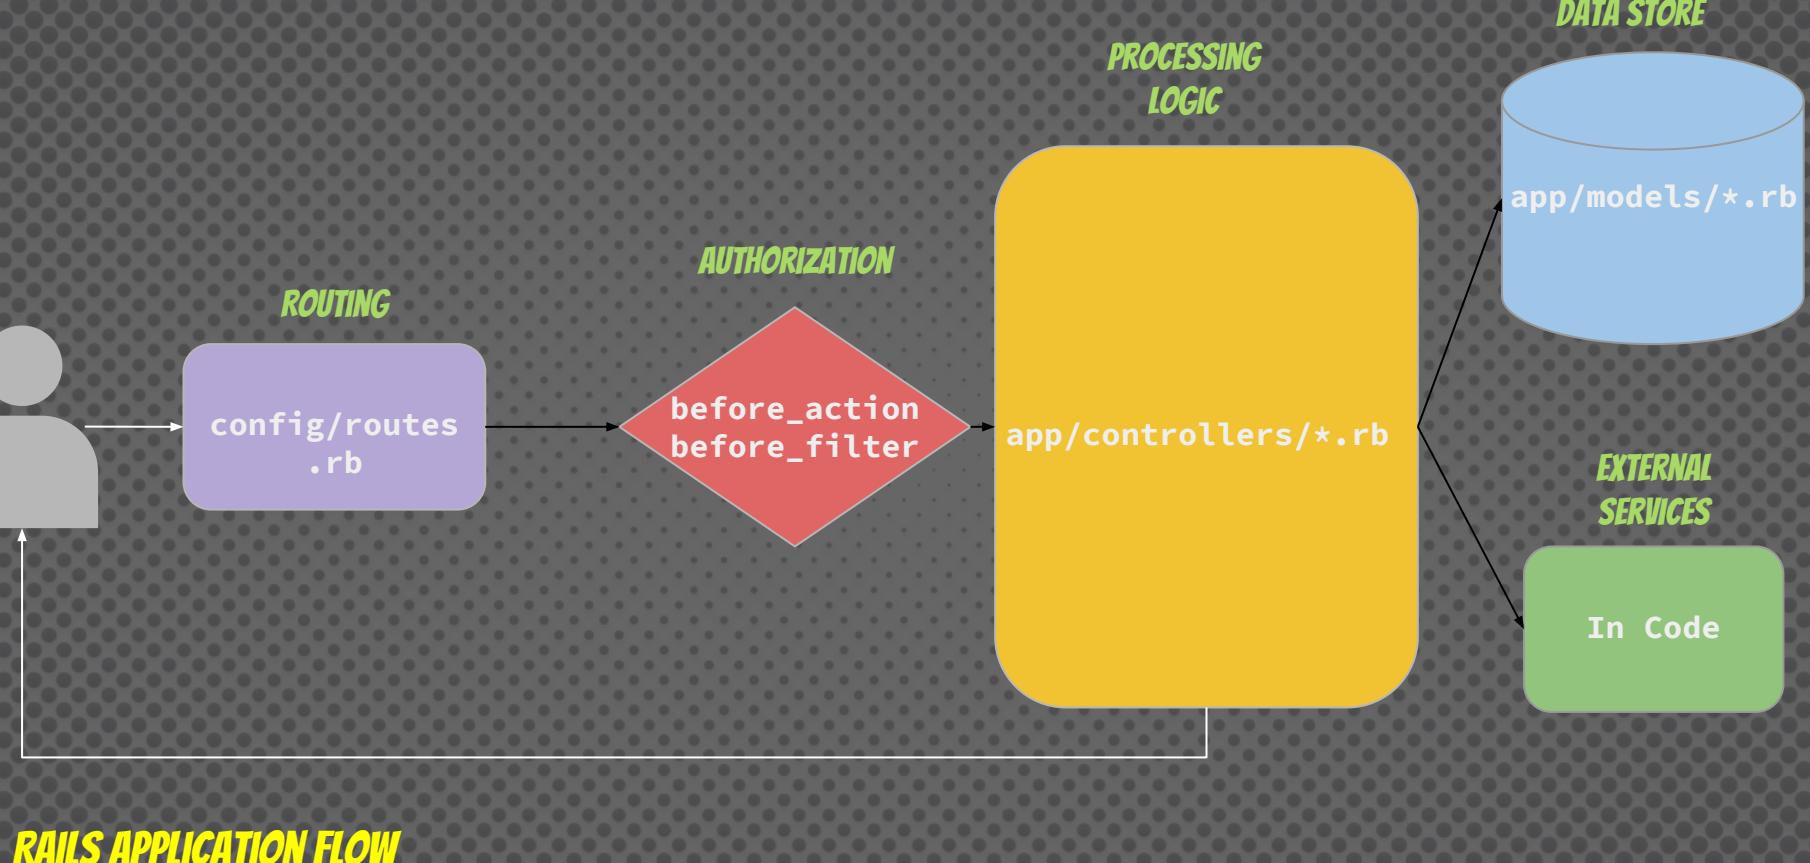

MAPPING

INFORMATION GATHERING - CREATE A MAP

- **IDENTIFY ENDPOINTS, TYPICAL EXAMPLES:**
 - **RAILS : CONFIG/ROUTES.RB** - `rake routes`
 - **DJANGO: URLs.PY** - `manage show_urls`
 - **NODEJS : INDEX.JS**
 - **JAVA SPRING : *CONTROLLER.JAVA**
 - **.NET CORE : *CONTROLLER.CS**
- **ENDPOINTS TYPICALLY HAVE AT LEAST THREE QUALITIES**
 - **AUTHORIZATION FILTER**
 - **LOGIC PROCESSING**
 - **DATASTORE ACCESS**

TYPICAL APPLICATION FLOW

RAILS - MAP

- RUN **rake routes** IF YOU CAN!

```
cktricky@Kens-MacBook-Pro ~ code/railsboat master rake routes
Prefix Verb URI Pattern Controller#Action
  login GET /login(.:format) sessions#new
  signup GET /signup(.:format) users#new
  logout GET /logout(.:format) sessions#destroy
forgot_password GET /forgot_password(.:format) password_resets#forgot_password
                  POST /forgot_password(.:format) password_resets#send_forgot_password
password_resets GET /password_resets(.:format) password_resets#confirm_token
                  POST /password_resets(.:format) password_resets#reset_password
dashboard_doc GET /dashboard/doc(.:format) dashboard#doc
sessions GET /sessions(.:format) sessions#index
          POST /sessions(.:format) sessions#create
new_session GET /sessions/new(.:format) sessions#new
edit_session GET /sessions/:id/edit(.:format) sessions#edit
session GET /sessions/:id(.:format) sessions#show
         PATCH /sessions/:id(.:format) sessions#update
         PUT /sessions/:id(.:format) sessions#update
        DELETE /sessions/:id(.:format) sessions#destroy
user_account_settings GET /users/:user_id/account_settings(.:format) users#account_settings
user_retirement_index GET /users/:user_id/retirement(.:format) retirement#index
```

RAILS - MAP

```
forgot_password GET /forgot_password(.:format)
```

```
password_resets#forgot_password
```

- **FOUR PARTS**
 - **PATH NAME (EG: FORGOT_PASSWORD_PATH)**
 - **HTTP VERB (EG: GET)**
 - **HTTP PATH (EG(S): FORGOT_PASSWORD, FORGOT_PASSWORD.JSON, FORGOT_PASSWORD.XML)**
 - **CONTROLLER AND ACTION (EG: CONTROLLER : PASSWORD_RESETS, ACTION : FORGOT_PASSWORD)**

RAILS - MAP

forgot_password GET

/forgot_password(.:format)

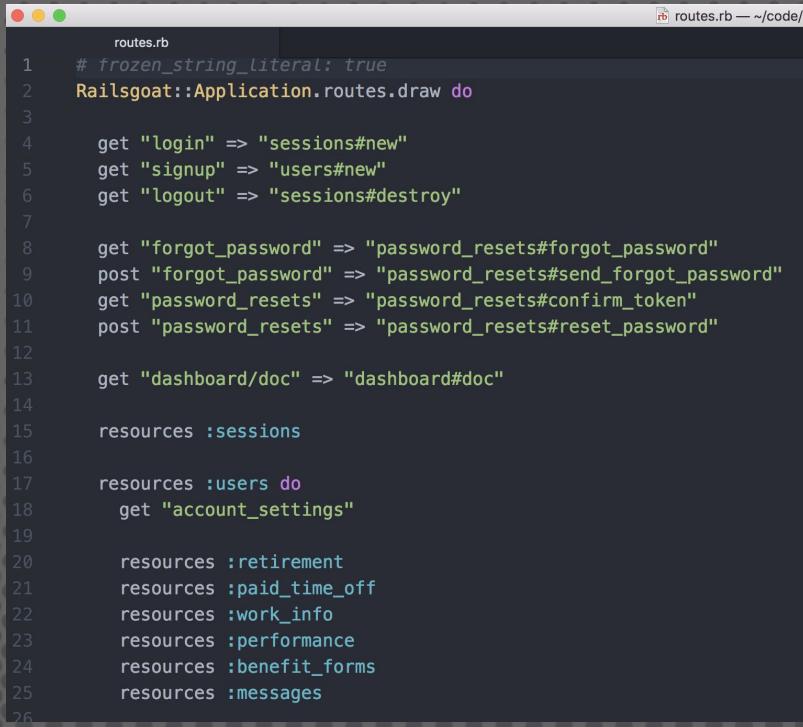

password_resets#forgot_password

- **FOUR PARTS**

- **PATH NAME (EG: FORGOT_PASSWORD_PATH)**
- **HTTP VERB (EG: GET)**
- **HTTP PATH (EG(S): FORGOT_PASSWORD, FORGOT_PASSWORD.JSON, FORGOT_PASSWORD.XML)**
- **CONTROLLER AND ACTION (EG: CONTROLLER : PASSWORD_RESETS, ACTION : FORGOT_PASSWORD)**

RAILS - MAP

- ***IF YOU CANNOT RUN RAKE ROUTES, YOU'LL HAVE TO REVIEW THE CONFIG/ROUTES.RB FILE:***

A screenshot of a terminal window titled "routes.rb" showing the contents of a Ruby file. The file defines routes for a "Railsgoat::Application" application. It includes routes for sessions (login, signup, logout), password resets (forgot_password, forgot_password), and various resources like users, retirement, paid_time_off, work_info, performance, benefit_forms, and messages. The code uses standard Ruby syntax with indentation and comments.

```
# frozen_string_literal: true
Railsgoat::Application.routes.draw do
  get "login" => "sessions#new"
  get "signup" => "users#new"
  get "logout" => "sessions#destroy"

  get "forgot_password" => "password_resets#forgot_password"
  post "forgot_password" => "password_resets#send_forgot_password"
  get "password_resets" => "password_resets#confirm_token"
  post "password_resets" => "password_resets#reset_password"

  get "dashboard/doc" => "dashboard#doc"

  resources :sessions

  resources :users do
    get "account_settings"
    resources :retirement
    resources :paid_time_off
    resources :work_info
    resources :performance
    resources :benefit_forms
    resources :messages
  end
end
```

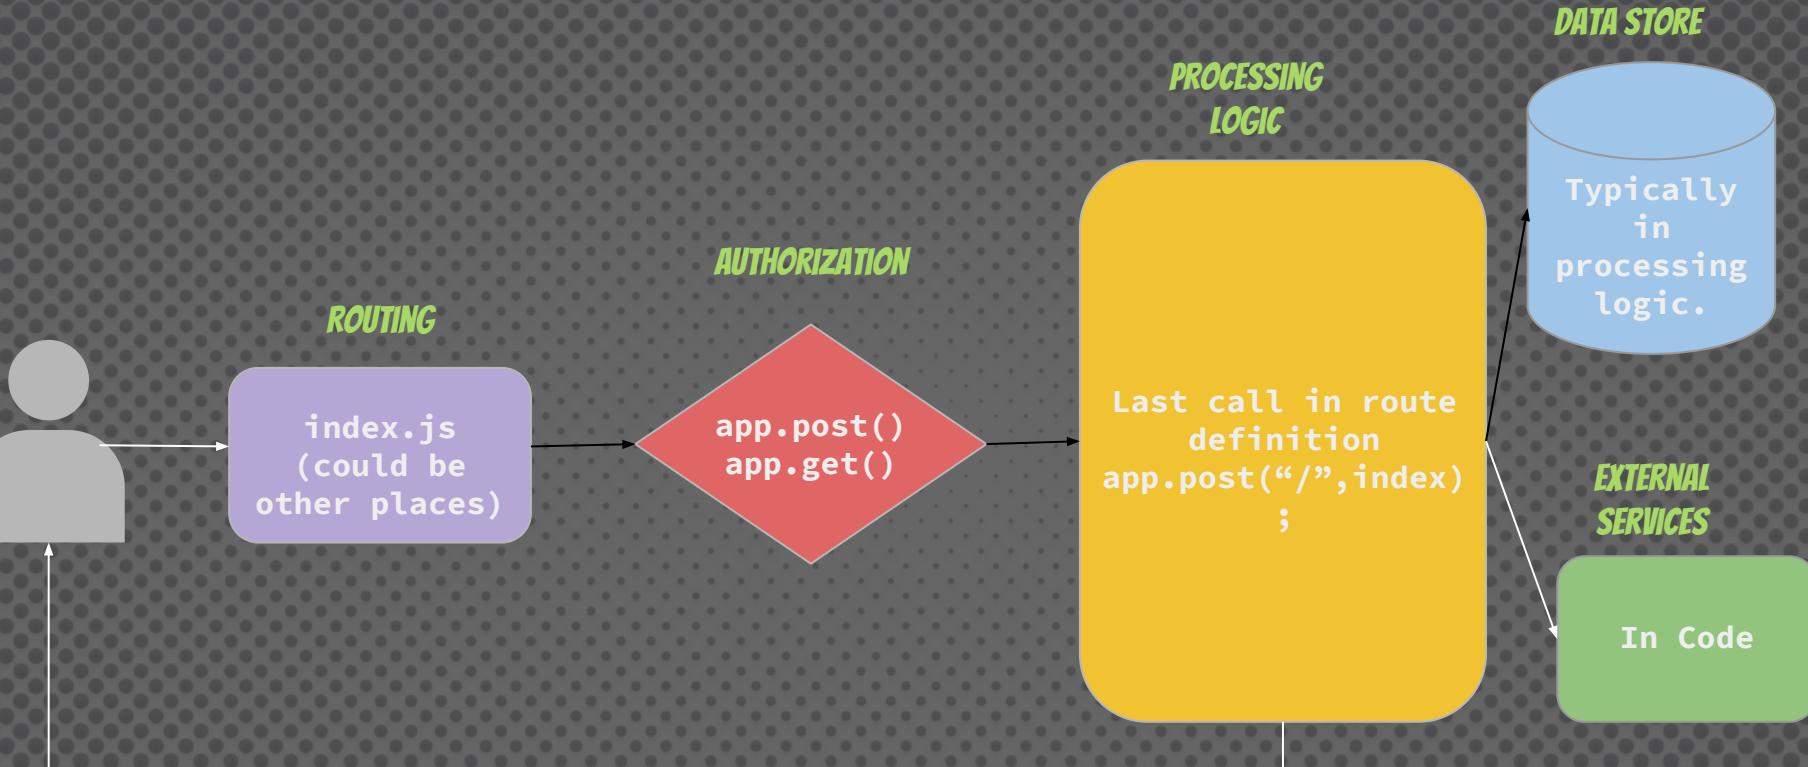

RAILS - ROUTING WEIRDNESS ALERT

- **WHAT DO PUT, PATCH, DELETE, AND POST ALL HAVE IN COMMON?**
- **THAT'S RIGHT, THEY ARE ALL POST REQUESTS**
- **RAILS USES THE _method PARAMETER TO DETERMINE WHAT KIND OF REQUEST IT IS**

RAILS - ROUTING WEIRDNESS ALERT

```
POST /join HTTP/1.1
Host: github.com
User-Agent: Mozilla/5.0 (Macintosh; Intel Mac OS X 10.14; rv:66.0)

```

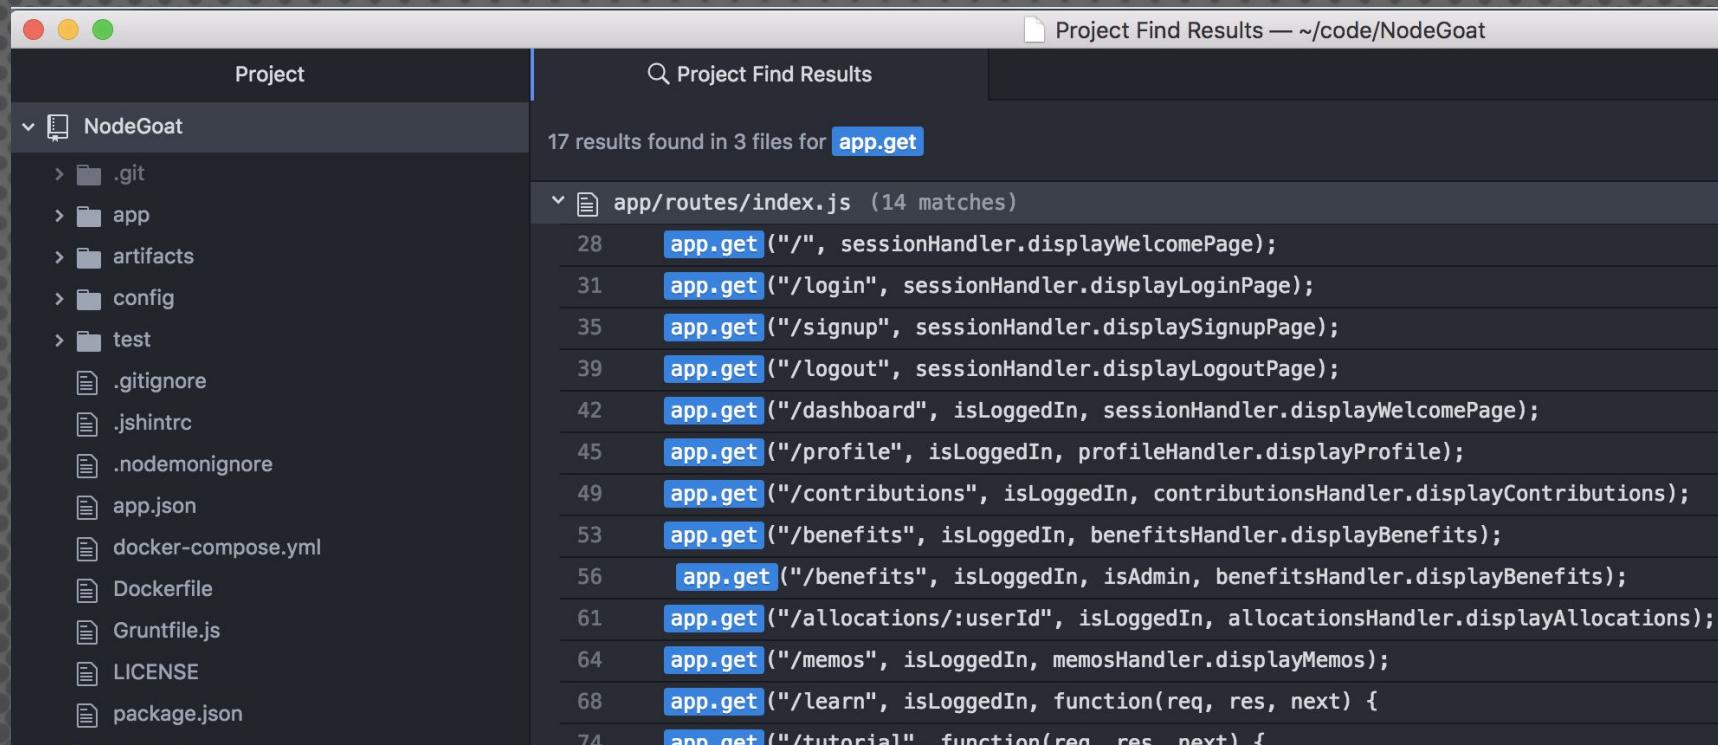

NODE.JS/EXPRESS APPLICATION FLOW

NODE.JS/EXPRESS - MAP

- **OUR FORMULA HAS BEEN SUPER BASIC, SEARCHING FOR:**
 - APP.GET
 - APP.POST
 - APP.DELETE
- **WE LIKE TO ANNOTATE WHICH OF THESE IS ACTUALLY USING MIDDLEWARE**
- **WE'LL CREATE A CHECKLIST FROM THIS FOR TRACING**

NODEJS/EXPRESS - MAP

HERE IS AN EXAMPLE FROM NODEGOAT, I DOWNLOADED IT, AND SEARCHED FOR APP.GET

The screenshot shows a Mac OS X desktop environment. On the left, there is a file browser window titled "Project" showing the contents of a directory named "NodeGoat". The contents include .git, app, artifacts, config, test, .gitignore, .jshintrc, .nodemonignore, app.json, docker-compose.yml, Dockerfile, Gruntfile.js, LICENSE, and package.json. On the right, there is a "Project Find Results" window with the title "Project Find Results — ~/code/NodeGoat". The search term "app.get" was entered, resulting in 17 matches found in 3 files. The results are listed in the "index.js" file under the "app/routes" directory, showing 14 matches. The code snippets are as follows:

```
28 app.get("/", sessionHandler.displayWelcomePage);
31 app.get("/login", sessionHandler.displayLoginPage);
35 app.get("/signup", sessionHandler.displaySignupPage);
39 app.get("/logout", sessionHandler.displayLogoutPage);
42 app.get("/dashboard", isLoggedIn, sessionHandler.displayWelcomePage);
45 app.get("/profile", isLoggedIn, profileHandler.displayProfile);
49 app.get("/contributions", isLoggedIn, contributionsHandler.displayContributions);
53 app.get("/benefits", isLoggedIn, benefitsHandler.displayBenefits);
56 app.get("/benefits", isLoggedIn, isAdmin, benefitsHandler.displayBenefits);
61 app.get("/allocations/:userId", isLoggedIn, allocationsHandler.displayAllocations);
64 app.get("/memos", isLoggedIn, memosHandler.displayMemos);
68 app.get("/learn", isLoggedIn, function(req, res, next) {
74 app.get("/tutorial", function(req, res, next) {
```

NODE.JS/EXPRESS - SEMGREP

SEMGREP IS A FAST, EASY, LIGHTWEIGHT WAY TO GET STARTED (NO WE DON'T ENDORSE AND IT IS FREE FOR COMMUNITY USE) - [SEMGREP.DEV](https://semgrep.dev)

REDIRECTION & AUTHORIZATION ISSUE IN .NET

Redirect(String, Boolean)

Redirects a client to a new URL. Specifies the new URL and whether execution of the current page should terminate.

C#

 Copy

```
public void Redirect (string url, bool endResponse);
```

Parameters

url String

The location of the target.

endResponse Boolean

Indicates whether execution of the current page should terminate.

AUTHZ FUNCTIONS - INCORRECTLY CONFIGURED EXAMPLE

application_controller.rb

```
1 # frozen_string_literal: true
2 class ApplicationController < ActionController::Base
3   before_action :authenticated, :has_info, :create_analytic, :mailer_optin
4   helper_method :current_user, :is_admin?, :sanitize_font
5
6   # Our security guy keep talking about sea-surfing, cool story bro.
7   # Prevent CSRF attacks by raising an exception.
8   # For APIs, you may want to use :null_session instead.
9   protect_from_forgery #with: :exception
10
```

AUTHORIZATION FUNCTIONS CHECKLIST

HOW IS USER ACCESS CONTROLLED?

- ***SESSION***
- ***TOKEN***
- ***BASIC AUTHENTICATION***
- ***SOMETHING... ELSE?***

AUTHZ FUNCTIONS CHECKLIST

IDENTIFY ITS PURPOSE

- **IS IT JUST CHECKING THAT WE'RE AUTHENTICATED?** - AUTHN
- **IS IT LOOKING FOR A SPECIFIC ROLE?** - RBAC
- **IS IT DOING SOME SORT OF HMAC VERIFICATION FOR EVENTS?**

AUTHZ FUNCTIONS CHECKLIST

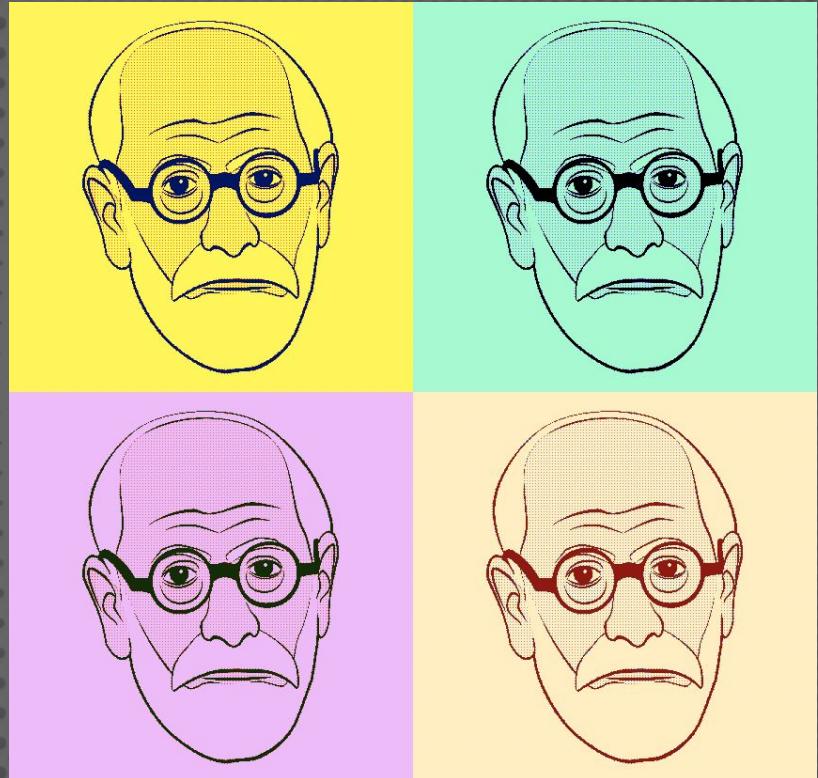

WHAT COULD GO WRONG?

- INSECURE TIMING COMPARISONS
- FRAMEWORK NUANCES
- IDOR (INSECURE DIRECT OBJECT REFERENCE)
- LACK OF RATE LIMITING (SEE THIS OFTEN WITH BASIC AUTH OR TOKENS)
- THINK ABOUT IF IT WAS *NOT* APPLIED, WHAT WOULD HAPPEN
- GET CREATIVE, YOU'RE TRYING TO DECIDE WHAT THE RISK, IF ANY, IS HERE

2. **HOW ARE USERS AUTHORIZED IN SKEA_RAILS?**
 - A. **COULD TAKE SOME TIME**

SIGMUND FREUD EXERCISE - POST-MORTEM

YEAH, YOU PROBABLY HAVE QUESTIONS RE: `authenticate_user!`

- A. WHICH IS WHY ITS PART OF THE EXERCISE :-D. THIS HAPPENS A LOT!

`home_controller.rb`

```
1  class HomeController < ApplicationController  
2      before_action :authenticate_user!  
3  
4  end
```

HOW TO DECIPHER WHERE THIS ACTION IS DEFINED WILL BE DEFINED BY:

- B. ACCESS TO AN INTERACTIVE RUNTIME ENV?
- C. EXPERIENCE WITH THE FRAMEWORK/LIBS?
- D. NO PREVIOUS EXPERIENCE WITH IT, ONLY ACCESS TO SOURCE?

SIGMUND FREUD EXERCISE - POST-MORTEM

DID YOU CATCH THE CSRF? - "FRAMEWORK NUANCE"

```
post    "/articles", to: "articles#create"
get     "/articles/new", to: "articles#new", as: :new_article
get     "/articles/:id/:action", to: "articles#edit", as: :edit_article
get     "/articles/:id", to: "articles#show", as: :article
post    "/articles/:id/vote/:type", to: "articles#vote", as: :vote
```

SIGMUND FREUD EXERCISE - POST-MORTEM

ANYONE KNOW WHAT THE REQUEST ATTACK STRING WOULD LOOK LIKE?

http://localhost:3000/articles/1/vote?type=like

```
get      "/articles/:id/:action", to: "articles#edit", as: :edit_article
```

SIGMUND FREUD EXERCISE - POST-MORTEM

SO WHAT'S THE POINT WITH THIS WHOLE THING?

- **DO YOUR HOMEWORK ON FRAMEWORK NUANCES**
- **GOOD EXAMPLE OF WHY WE DOUBLE-BACK AND CHECK ONE LAST TIME... (STORY TIME)**

PULL REQUEST REVIEWS

PULL REQUEST REVIEWS - OVERVIEW

NOT AN END-TO-END CODE REVIEW

UNDERSTANDING CONTEXT IS Critical**

COMMON COMPONENTS:

- **TESTS (AND THERE NEEDS TO BE TESTS)**
- **CONVERSATION (CONTEXT)**
- **CODE**

The screenshot shows a GitHub pull request page for a PR titled "Allow iframe inside details liquid tag #11413". The PR is closed and merged into the `forem:main` branch from the user `akashdotsrivastava`. The PR has 2 commits, 3 checks, and 5 files changed. The review highlights a specific commit that added support for `iframe` tags within `details` tags in the Liquid template language.

What type of PR is this? (check all applicable)

- Refactor
- Feature
- Bug Fix
- Optimization
- Documentation Update

Description

Added iframe and its missing attributes to the list of allowed tags and attributes for `sanitize` Rails helper, which allows `iframe` elements in details tag to be parsed correctly when sanitized.

Additional Changes

The issue was with `sanitize` used in

```
forem/app/liquid_tags/details_tag.rb
Line 13 in 31a7f9c
13   parsed_content = sanitize(content.xpath("//html/body").inner_html)
```

It by default, does not allow `iframe` as a tag while sanitizing, hence the youtube tag render, an iframe equivalent, though present in the xpath wasn't passing `sanitize`.

Unfortunately, there is no way to `add / insert` a new tag to the list of default allowed tags for `sanitize`. It either takes the default list (with no `tags` and `attributes` option), or only takes a list of tags and attributes to be allowed while sanitization, through array options `tags` and `attributes`.

To allow `iframe` along with all the existing tags and attributes by default, I picked the default lists of tags and attributes from <https://github.com/rails/rails-html-sanitizer/blob/51dc564c6509201070f72456bb2c13fb7bb373d6/lib/rails/html/sanitizer.rb#L108..L111>. I added the required tag for youtube video `iframe` and a couple of missing attributes for the same in the attributes list.

Related Tickets & Documents

Closes #11060

QA Instructions, Screenshots, Recordings

1. Create a new post with this content (a details tag with some text content and a youtube video tag)

```
% details Details and Video %
This is a youtube video
% youtube 3xTlHxHdb4U %

end
```

AUTHORIZATION REVIEW CHECKLIST

- IS IT POSSIBLE TO BYPASS AUTHORIZATION RESTRICTIONS BY ACCESSING CONTENT DIRECTLY (E.G. CAN A NON-PRIVILEGED USER ACCESS THE ADMINISTRATION PAGES OF AN APPLICATION)?
- CAN A USER ESCALATE PRIVILEGES THROUGH COOKIE MODIFICATION, ALTERING FORM INPUT VALUES AND HTTP HEADERS, OR BY FUZZING URL-BASED PARAMETERS?
- ARE THERE HORIZONTAL ESCALATION/INSECURE DIRECT OBJECT REFERENCES IN THE SOURCE CODE?
- ARE AUTHENTICATION AND AUTHORIZATION FLOWS THE FIRST LOGIC EXECUTED FOR EACH REQUEST?
- ARE AUTHORIZATION CHECKS GRANULAR (PAGE AND DIRECTORY LEVEL) OR PER-APPLICATION?

AUTHORIZATION REVIEW CHECKLIST

- ARE ACCESS TO SENSITIVE PAGES AND DATA DENIED BY DEFAULT?
- ARE USERS FORCED TO RE-ASSERT THEIR CREDENTIALS FOR REQUESTS THAT HAVE CRITICAL SIDE-EFFECT (ACCOUNT CHANGES, PASSWORD RESET, ETC)?
- DO AUTHORIZATION CHECKS HAVE CLEARLY DEFINED ROLES?
- CAN AUTHORIZATION BE CIRCUMVENTED BY PARAMETER OR COOKIE/TOKEN MANIPULATION?
- ARE CSRF PROTECTIONS IN PLACE AND APPROPRIATE?

FIRST OF ALL LOOK INTO VIEWS.PY

The screenshot shows a code editor with a dark theme. At the top, there are two tabs: "settings.py" and "views.py", with "views.py" being the active tab. Below the tabs is a breadcrumb navigation bar showing the file structure: "... RPS > Training > SKEA > skea_django > intro > views.py > create_todo". The main area contains Python code. Lines 12 and 13 are comments. Line 14 starts a function definition for "index". Line 15 returns an HTTP response. Line 16 is blank. Line 17 contains the decorator "@login_required". Line 18 starts a function definition for "todo". Line 19 checks if the request method is GET. Line 20 starts a try block. A pink rectangular box highlights the "@login_required" decorator in line 17.

```
12
13 # Create your views here.
▼ 14 def index(request):
    return HttpResponse("Welcome to Seth & Ken's Excellent Adventures")
16
17 @login_required
▼ 18 def todo(request, todo_id):
    if request.method == 'GET':
        try:
```

EXERCISE BEETHOVEN - POST-MORTEM

SESSIONS - ONLY INDICATION WE HAVE OF ACTIVITY IS SETTINGS.PY

```
32
33 INSTALLED_APPS = [
34     'intro.apps.IntroConfig',
35     'django.contrib.admin',
36     'django.contrib.auth',
37     'django.contrib.contenttypes',
38     'django.contrib.sessions', [
39     'django.contrib.messages',
40     'django.contrib.staticfiles',
41     'django_extensions',
42 ]
43
44 MIDDLEWARE = [
45     'django.middleware.security.SecurityMiddleware',
46     'django.contrib.sessions.middleware.SessionMiddleware', [
47     'django.middleware.common.CommonMiddleware',
48     'django.middleware.csrf.CsrfViewMiddleware',
49     'django.middleware.clickjacking.XFrameOptionsMiddleware'
```

EXERCISE BEETHOVEN - POST-MORTEM

SESSIONS - DJANGO DOCUMENTATION HELPS US OUT A LITTLE.

Configuring the session engine

By default, Django stores sessions in your database (using the model `django.contrib.sessions.models.Session`). Though this is convenient, in some setups it's faster to store session data elsewhere, so Django can be configured to store session data on your filesystem or in your cache.

EXERCISE BEETHOVEN - POST-MORTEM

SESSIONS - BUT ALSO GIVES US A WARNING...

Warning

If the **SECRET_KEY** is not kept secret and you are using the **PickleSerializer**, this can lead to arbitrary remote code execution.

An attacker in possession of the **SECRET_KEY** can not only generate falsified session data, which your site will trust, but also remotely execute arbitrary code, as the data is serialized using pickle.

If you use cookie-based sessions, pay extra care that your secret key is always kept completely secret, for any system which might be remotely accessible.

EXERCISE BEETHOVEN - POST-MORTEM

ALRIGHT, SO WE SHOULD CHECK THE RANDOMNESS OF THE SECRET_KEY

21

22 # SECURITY WARNING: keep the secret key used in production secret!
23 SECRET_KEY = '*@ty00=62-recu@lsczr-00(%y97c(l11gnv9pu7o^)h%#e17d'

24

LOOKS RANDOM AND SECURE, RIGHT? WHAT ARE THE CONCERNS YOU HAVE WITH THIS? BUELLER?

EXERCISE BEETHOVEN - POST-MORTEM

- **POSSIBLE ISSUES (OUTSIDE OF ENCRYPTION ROUTINES):**
 - A. HARDCODED VALUES STORED IN SOURCE
 - B. SAME KEY USED FOR DEV/STAGING/PRODUCTION

EXERCISE BEETHOVEN - POST-MORTEM

PASSWORD STORAGE? NOTHING IN SETTINGS.PY?

How Django stores passwords

Django provides a flexible password storage system and uses PBKDF2 by default.

The **password** attribute of a **User** object is a string in this format:

```
<algorithm>$<iterations>$<salt>$<hash>
```

EXERCISE BEETHOVEN - POST-MORTEM

PASSWORD_HASHERS IN SETTINGS.PY

```
[  
    'django.contrib.auth.hashers.PBKDF2PasswordHasher',  
    'django.contrib.auth.hashers.PBKDF2SHA1PasswordHasher',  
    'django.contrib.auth.hashers.Argon2PasswordHasher',  
    'django.contrib.auth.hashers.BCryptSHA256PasswordHasher',  
    'django.contrib.auth.hashers.BCryptPasswordHasher',  
    'django.contrib.auth.hashers.SHA1PasswordHasher',  
    'django.contrib.auth.hashers.MD5PasswordHasher',  
    'django.contrib.auth.hashers.UnsaltedSHA1PasswordHasher',  
    'django.contrib.auth.hashers.UnsaltedMD5PasswordHasher',  
    'django.contrib.auth.hashers.CryptPasswordHasher',  
]
```

EXERCISE BEETHOVEN - POST-MORTEM

DID YOU RUN THE APP?

```
